

DX- Fusion

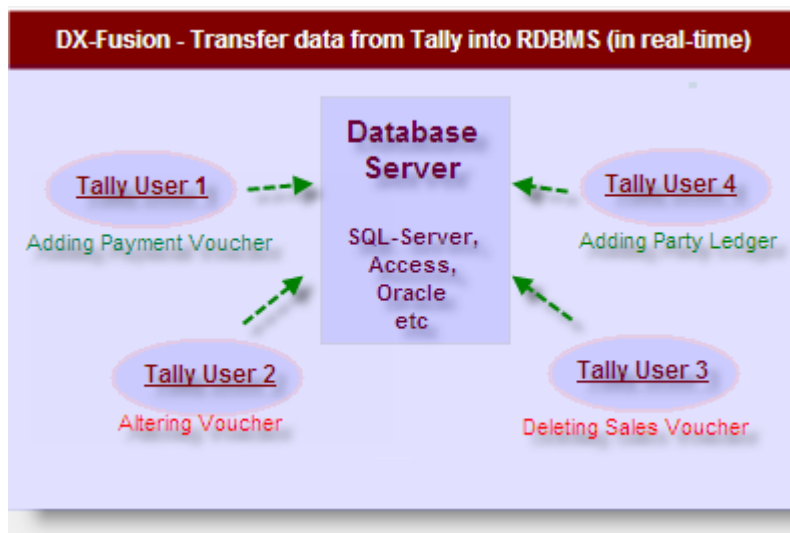

Product : DX-Fusion
Platform : Windows 2000 and above
Tally : Tally ERP 9 Release 1.61 and above
Category : Utility to transfer data from Tally ERP 9 into RDBMS (database) in real-time.

An Introduction to DX-Fusion

DX-Fusion is an utility that transfers data from Tally ERP 9 into your database in **real-time**. It supports MS-SQL Server, MS-Access, MySQL, Oracle and many other popular databases.

DX-Fusion works with **Tally ERP 9** Release 1.61 and higher versions. It can retrieve data from Tally in both online (real-time) and off-line modes.

DX-Fusion utility does NOT require any coding (*except for a connection-string to connect to the database*) and can be used by developers and end-users both. Developers can use this data for designing of MIS reports and Integration with other external softwares.

DX-Fusion Editions

Free Edition

A fully functional edition of DX-Fusion utility which supports transfer of all masters and vouchers data from Tally ERP 9 into your database without any restriction on number of entries or any date restriction. It supports **off-line** mode only.

Standard Edition

A software utility for transferring masters and vouchers data from Tally ERP 9 into your database in Real-time (online mode).
