

Firebug 1.7.3 Shortcuts

Platform: Windows/English

Many Shortcuts listed in the Firebug Help File are conflicting with Firefox Shortcuts. Below what I got working. Firebug also gives the possibility to setup custom shortcuts, which may help. What I am missing is a shortcuts to jump to each panels (Console, Html, CSS, etc) directly or set the focus on Firebug.

Managing Firebug	
F12 or b	Open and close Firebug Panel
ctrl+f, then shift+tab	With Firebug Panel open, will put focus on the Panel (via the Firefox Find Box). Does not always work depending on what Panel is open
ctrl+f12	Open Firebug in window (for some reason sometimes pressing ctrl+f12 again closes Firefox, use ctrl+w to close the Firebug window instead
ctrl+shift+c	Toggle Inspect Mode
ctrl+shift+l	Focus Command Line
ctrl+shift+k	Focus Search Box
f1	Firebug Help Page

HTML-Panel	
arrow down / arrow up	One line down / one line up
ctrl+arrow down / ctrl+arrow up	One Node up / one Node down
arrow left / arrow right	Collapse / Expand current node

CSS-Panel	
tab/shift+tab	Jump to next / jump to previous field
arrow up / arrow down field with number value	Increase / decrease number by 1
page up / page down field with number value	Increase / decrease number by 10
enter	Finish editing
escape	Cancel editing

Script-Panel	
f8	Continue
f10	Step Over
f11	Step Into
shift+f11	Step Out
Click on line number	Toggle breakpoint
shift'click on line number	Disable breakpoint
right-click on line number	Edit breakpoint condition
ctrl+. / ctrl+,	Next / previous function on stack
ctrl+space	Focus Scripts Location Menu
ctrl+shift+n	Focus Watch Side Panel
