- (aa) Number of accidents (bb) Mandays lost

suggestion Scheme

25. (a) Is a Suggestion Scheme in operation in the factory ?
.....
- (b) If so, the number of suggestion :
- (i) Received during the year
.....
- (ii) Accepted during the year
.....

[4]

- (c) Amount awarded in cash prizes during the year :
- (i) Total amount awarded
.....
- (ii) Value of the maximum cash prize awarded
.....
- (iii) Value of minimum cash prize awarded
.....

Certified that the information above is, to the best of my knowledge and belief, correct.

Date
.....

Signature of the

Manager

THIS RETURN SHOULD BE SENT TO THE CHIEF INSPECTOR OF FACTORIES

BY 31ST JANUARY OF THE SUCCEEDING YEAR

Explanatory Notes :

1. The average number of workers employed daily should be calculated by dividing the aggregate number of attendance on working days (that is, mandays worked) by the number of working days in the year. In reckoning attendance, attendance by temporary as well as permanent employees should be counted, and all employees (including apprentices) should be included, whether they are employed directly or under contractors. Attendance on separate shifts (e.g. night and day shifts) should be counted separately. Days on which the factory was closed for whatever cause, and days on which the manufacturing processes were not carried on should not be treated as working days. However, if more than 50% of workers employed (on the previous day) attend to repair, maintenance or other such work on closed days, such days should be treated as working days. Partial attendance for less than half a shift on a working day should be ignored, while attendance for half a shift or more on such day should be treated as full attendance.
2. For seasonal factories, the average number of workers employed during the working season and the off season should be given separately. Similarly the number of days worked and average number of manhours worked per week during the working and off season should be given separately.
3. The average number of hours worked per week means the total actual hours worked by all workers during the year excluding the rest intervals but including overtime work divided by the product of average number of workers employed daily in the factory during the year and 52. In case the factory has not worked for the whole year, the number of weeks during which the factory worked should be used in place of the figure 52.
4. Every person killed or injured should be treated as one separate accident. If in one occurrence, six persons were injured or killed it should be counted as six accidents.
5. In item 24 (a) the number of accidents which took place during the year should be given. In case of non-fatal accident, only those accidents which prevented workers from working for 48 hours or more, immediately following the accident should be indicated.
