

Guide for Authors

The Issues in Business Management and Economics (IBME) is an international scholarly journal published online monthly by **Journal Issues**. It is an open access journal that provides scholarly, educative and prompt articles that satisfies the growing demand for economic based essential information that can be utilised by Professionals in academia, government, industry, engineering, management, planning, and public health.

Terms of submission

Submission of article is on the understanding that the article has not been previously published in any other form and is not under consideration for publication elsewhere. Except in the form of an abstract or as part of a published lecture or academic thesis. Also, the article should not be currently under consideration by another journal published by **Journal issues** or any other publisher.

Procedure for the submission of manuscripts

Manuscript should be submitted online via

http://www.journalissues.org/journal_items.php?p=submit_man&id=2

Upon receipt of manuscript submission, the Editor-in-chief sends an E-mail of confirmation to the corresponding author within 1-2 working days. In absence of a confirmation email, you are advice to contact the help assistant via this email address; info@journalissues.org.

Organisation and style of manuscripts

The **cover letter** should include:

- (a) The name of author(s) including first name(s).
- (b) Name of the department(s) institution(s) in which the work was done including full contact address telephone/fax numbers of authors and that of the corresponding author's.
- (c) It should be in an e-mail message sent to the Editor-in-chief along with the article.
- (d) The authors may also suggest two or more reviewers for the manuscript along with their Uniform Resource Locator (URL) for proper identification of the reviewer(s).
- (e) The author should take the undertaking that the manuscript has not been published elsewhere except in the form of an abstract or as part of a published lecture or academic thesis. Also, in the case of more than one author, the corresponding author should do same.

Peer Review: All manuscripts are subject to double-blind system for peer-review; the reviewer(s) identities remain anonymous to authors. The paper will be peer-reviewed by three experts; one is an editorial board member and the other two are external reviewers. The review process may take 12 days. Decisions will be made as fast as possible, and reviewer(s) comments sent to the author immediately.

Types of articles:

Original Research Articles: These should describe new and carefully analysed and confirmed findings, backed with experimental procedures. Articles should be given in sufficient details for others to verify the work. The length of a full paper should be concise, required to describe and interpret the work clearly. Please include in the main paper a set of **keywords** and an abstract followed by INTRODUCTION, MATERIALS and METHODS, RESULTS, DISCUSSION, ACKNOWLEDGMENTS and REFERENCES. All these must be in capital letters but not underlined.

Short Research Communication: These should present a concise study, or sometimes preliminary but innovative. A research finding that might be less substantial than a full research paper. Short Research Communication is limited to 3000 words (excluding references and abstract). The main sections need not conform to that of full-length papers. It should have a set of **keywords** and an abstract summarizing background of the work, the results and their implications. RESULTS AND DISCUSSION Section should be combined and followed by CONCLUSION. MATERIALS AND METHODS will remain as a separate section.

Review or mini-review: A review article typically presents a summary and critical evaluation of information that has already been published, and considers the progress of current research toward clarifying a stated problem or topic. Submissions of reviews and perspectives covering topics of current interest are welcome and should be authoritative. Reviews should be concise, not exceeding 7 printed pages.

Author(s) are advised to carefully consider the preparation of papers to ensure that they communicate efficiently. Papers are much more likely to be accepted, if they are carefully designed and laid out, containing fewer or no errors. Papers should be conventional to the approach and instructions. However, author(s) are advised not to do self citation of previous study within their paper in order to uphold the credibility of their paper. Articles with self citations may not stand the chance of being accepted except absolutely necessary.

Original Research Articles

All portions of the manuscript must be typed **double-spaced** and **all pages numbered** starting from the **title page**.

The **Title** should be a brief phrase describing the contents of the paper. The Title Page should include the authors' full names and affiliations, the name of the corresponding author along with phone, fax and E-mail information. An asterisk (*) must be placed after the corresponding authors name as superscript whose email id, fax, telephone number can be given at the bottom left corner of the title. Corresponding author has the responsibility to ensure that all **co authors** are aware and approve the contents of the submitted manuscript.

An **abstract** of not more than 200 words should contain the objective, concise description of study design of plan, result and conclusion. Authors may list a maximum of ten keywords for subject classification.

Abbreviations are to be used sparingly and given at first mention of word. Each abbreviation should be spelled out and introduced in parentheses the first time it is used in the text. Only recommended SI units should be used. Please separate the items by ";".
E.g. HIV: human immunodeficiency virus; SIV: simian immunodeficiency virus;

The **Introduction** should provide a clear statement of the problem, the relevant literature on the subject, and the proposed approach or solution. It should be understandable to colleagues from a broad range of scientific disciplines.

Materials and methods This should be sufficiently detailed (with reference where possible) to permit other work to duplicate the study. Sources of materials used must be given and statistical method must be specified by reference unless non standard ones are used.

The **Results** must be clearly and concisely with the help of appropriate illustrative material tables and/or figures.

The **Discussion** should interpret the findings in view of the results obtained in this and in past studies on this topic. Unjustified speculation should be avoided.

Acknowledgments (if any) should be included at the very end of the paper before the references and may include supporting grants, presentations, and so forth.

Tables should be kept to a minimum and be designed to be as simple as possible. Tables are to be typed double-spaced throughout. Including headings. Each table should be on a separate page, numbered consecutively in Arabic numerals and supplied with a heading and a legend. Each table should include a title and be comprehensible without reference to the text. Tables adapted or reproduced verbatim from another source must acknowledge that source in footnote.

Figure legends should be typed in numerical order on a separate sheet. Graphics should be prepared using applications capable of generating high resolution GIF, TIFF, JPEG or PowerPoint before pasting in the Microsoft Word manuscript file. Tables should be prepared in Microsoft Word. Use Arabic numerals to designate figures and upper case letters for their parts (Figure 1). Begin each legend with a title and include sufficient description so that the figure is understandable without reading the text of the manuscript. Information given in legends should not be repeated in the text. Please present the Tables and Figures at the end of the paper.

References: In the text, a reference identified by means of an author's name should be followed by the date of the reference in parentheses. Authors are responsible for ensuring that the information in each reference is complete and accurate. All references should be cited within the text; otherwise, these references will be automatically removed. References should be arranged first alphabetically and then further sorted chronologically if necessary. More than one reference from the same author(s) in the same year must be identified by the letters "a", "b", "c", etc., placed after the year of publication. Journal names are abbreviated according to the ISSN List of Title Word Abbreviations, see www.issn.org/2-22661-LTWA-online.php. Authors are fully responsible for the accuracy of the references

Proofs and Reprints: Electronic Gallery proofs will be sent via (e-mail attachment) to the corresponding author as a PDF file. Gallery proofs are considered to be the final version of the manuscript. With the exception of typographical or minor clerical errors, no changes will be made in the manuscript at the proof stage. It is the responsibility of the corresponding author to ensure that the galley proofs are to be returned 3-4days of receipt with correction if (any). The authors are responsible for the contents appeared in their published manuscripts.

Copyright: Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, or thesis) that it is not under consideration for publication elsewhere; that if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher. Open Access authors retain the copyrights of their papers, and all open access articles are distributed under the terms of the Creative Commons Attribution license, which permits unrestricted use, distribution and reproduction in any medium, provided that the original work is properly cited.
