How to register the Software?

1. Run the software.
2. Click the Register Button.

3. The following screen will appear:

4. Enter the “Serial Key” (as received by you via mail after the payment).
5. Click Submit.

And you are done.

If the Serial Key entered is valid, your software will be registered.

Note: The software will create a text file named “License” which will hold the serial key in the same folder of the software. If you delete or move the License file, you software will run as “Unregistered”. You can reenter the serial key to get it registered.

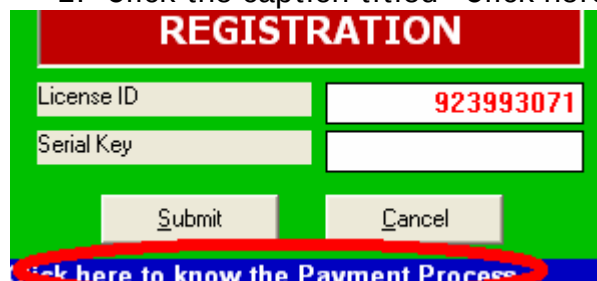

The registration is valid for one computer and different Serial key is required for multiple computers. **Also if the computer is formatted, you need a new serial key against payment.**

Validity of registration

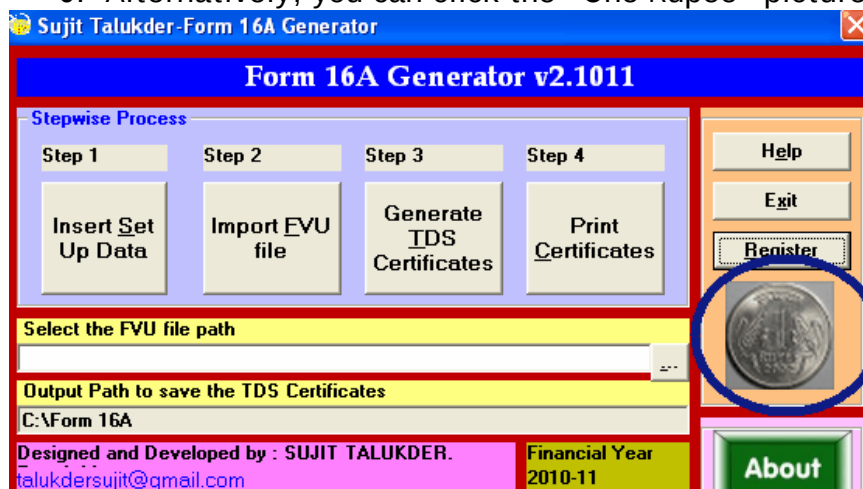

This software will generate TDS certificates for Financial year 2010-11 only and registration is valid for the said Financial Year. Also, registration is computer specific. For running the software on multiple computers, multiple serial keys are required to be obtained. **ALSO IF COMPUTER IS FORMATTED NEW SERIAL KEY IS REQUIRED TO BE OBTAINED AGAINST PAYMENT.**

How to make the payment?

1. Run the software.
2. Click the caption titled “Click here to know the payment process.”

3. You will get the details of payment.
4. Please don't pay by CASH.
5. After the payment, send the License ID, Payment details at my email id. After the payment is cleared, you will receive the “Serial key” via email. My email id is provided in the software.
6. Alternatively, you can click the “One Rupee” picture to know the payment process.

How to Run the software?

Before running the software, please ensure to do the followings:

Keep the following files inside the same folder where the software is kept:

1. Sujit Talukder-16A-New (Excel File)
2. SujitTalukder-Form16A Template (Excel Template File)
3. Help (Pdf file)

Else errors will come and software will not run / work properly.

What are the limitations to unregistered users?

Unregistered users will see a pop up message every time they use the software.

Registered users will not see the message.

The fvu file must contain more than 5 deductee records.

Please note that registered users doesnot have such limitation.

Note: Since the TDS certificates are generated from fvu files and fvu files does not contain address of deductees, the same will not come in the TDS certificates. This is applicable to Registered users also.

How to save the certificates?

The software provides the Output path to save the certificates. The certificates are generated and saved by the software automatically in the folder named Form16A and the folder is saved in the same folder of the software.

Do the folders are need to be created manually?

The folder specified in the Output path is not required to be created manually. The software will create the same if the folder does not exist in the specified directory. The software will create the folder in the same folder where the software is kept. The path is shown in the appropriate place.

How the certificates are dealt by the software after generation?

After the certificates are generated successfully, you are requested to move the folder to some other place or rename the folder. For eg if the certificates are generated at C:\Form16A, then move the same folder to say D:\ or you can rename the folder as C:\Form16A_FY1011_Q1. Since on next run, the software will delete the folder as provided in the Output path box. For eg., when you will run the software for Qtr 2 and the output path specified is C:\Form16A the software will first delete the folder and then create the folder to save the certificates for Qtr2.

How to print the software?

After the certificates are generated you can print the same in the following manner:

1. By manually opening the Form16A folder and individually printing the certificates.
2. By using the Print button of the software. The software lists the certificates as contained in the Form16A folder residing in the same folder of the software. If you

have renamed the folder or moved the folder, the certificates list will not come in the print list.

3. If the list is filled you may start printing the certificates by clicking the print button. The certificates are printed in the default folder.

Error showing file already open.

If the software shows the error “Sujit Talukder-Form16A” already open. Do the followings:

1. If this message comes, then close the file and then run the software.
2. If this message is coming but the file is not opened then restart the computer to solve the problem.

Instead of restarting the computer, Press Ctrl+Alt+Delete keys from Keyboard, Select “Processes” tab, Choose all the instances of “EXCEL.EXE” and click End Process. Thereafter run the software.

Deductee address in TDS certificate is missing

Please note this software generates TDS certificates from fvu files. The fvu files doesnot contain address of dedcutees and therefore the software will not be able to put the address data. Since the tds certificates are generated ans saved in Ecel file format which is editable, one may put the same manually.

PLEASE NOTE ADDRESS OF DEDUCTEES WILL NOT COME IN TDS CERTIFICATES TO REGISTERED USERS ALSO.

OS and Excel version

This software has been tested on Windows XP (SP 2) and Excel 2003 version.

Precautions:

1. Don't rename any Excel file .
2. Don't rename any Excel sheets of any Excel file.
3. Keep all the files in the same folder of the software.
4. Please note on next time when you will generate the TDS certificates, all the TDS certificates in the Form 16A folder will be deleted by the software and the new files will be saved there. In case you need the backup of the certificates, you need to move the certificates elsewhere or rename the Form16A folder.
5. while the software is running, do not open any associated Excel files or templates.
6. Do not alter or tamper the format of any excel file or template.
