|---------------------------------------|------------------|--------------------------------------------------------------------------|------------------|
| <b>To salaries and wages</b>          | <b>1,92,500</b>  | <b>By gross profit b/d</b>                                               | <b>11,70,000</b> |
| To general expenses                   | 74,000           | By subsidy from govt.                                                    | 60,000           |
| To depreciation                       | 82,000           | By profit on sale of assets(cost price Rs.2,50,000 and WDV Rs. 1,80,000) | 1,00,000         |
| To expenditure on scientific research | 14,000           |                                                                          |                  |
| To manager's salary                   | 3,00,000         |                                                                          |                  |
| To commission to manager(on account)  | 6,000            |                                                                          |                  |
| To reserve for bad debts              | 17,500           |                                                                          |                  |
| To provision for tax                  | 2,40,000         |                                                                          |                  |
| To proposed dividend                  | 1,00,000         |                                                                          |                  |
| To balance c/d                        | 3,04,000         |                                                                          |                  |
|                                       |                  |                                                                          |                  |
|                                       | <u>13,30,000</u> |                                                                          | <u>13,30,000</u> |

# SOLUTION

- Calculation of net profit for the purpose of calculation of managerial remuneration:

|                                              |               |
|----------------------------------------------|---------------|
| <b>Net profit as per profit and loss a/c</b> | <b>304000</b> |
| Add: Items to be added back-                 |               |
| proposed dividend                            | 1,00,000      |
| provision for taxation                       | 2,40,000      |
| reserve for bad debts                        | 17,500        |
| commission to manager (on account)           | 6,000         |
| expenditure on scientific research           | 14,000        |
| depreciation                                 | 1,000         |

|                                                      |          |
|------------------------------------------------------|----------|
| <b>Less : Items to be deducted</b>                   |          |
| profit on sale of fixed asset                        | 30,000   |
| Net profit for the purpose of managerial calculation | 6,52,500 |

|                                             |              |
|---------------------------------------------|--------------|
| <b>Manager's commission</b>                 | <b>6,460</b> |
| Less: advance paid on account of commission | 6000         |
| <b>Amount still payable to manager</b>      | <b>460</b>   |

# WORKING NOTES

- Profit on sale:
  - 1 Book value=original cost-accumulated depreciation  
 $1,80,000 = 2,50,000 - \text{accumulated depreciation}$   
Accumulated depreciation=70,000
  - 2 Selling price-book value=+profit/-loss  
Selling price-1,80,000=1,00,000  
Selling price=2,80,000

- Manager's commission =  $(\text{net profit} \times \text{rate}) / 100 + \text{rate}$

Manager's commission =  $(652500 \times 1) / 101$

Manager's commission = 6460
