Life Insurance

SEC 80C

- The only product you should consider from Life Insurance companies is iV Term Plan
The sum assured on death should be at least 10 times the annual premium
- This limit is altered only in special cases of disability (the premium should be 15% or less of sum assured)
- Buy insurance only if you have dependents.! Do not buy insurance to save tax!
There are plenty of better ways to save taxes

How much Insurance?

Your life insurance should be adequate to replace your income
This roughly turns out to be 7 to 10 times your present annual income
This might vary widely based on your assets, liabilities and situation

Pension Plans from Insurance Companies

SEC 80CCC

- Pension Plans from Insurance Companies Qualify for deduction under Sec 80CCC
- There were few launches in Pension Plan space this year from life insurance companies
- These are very inefficient products, so you should stay away from these plans
- They generally have assured return in the range of 1-2% per annum, which is very low return. Savings accounts pay at least 4%

Why you should never buy these Pension Plans?

- Low Returns: They don't invest in equities, which is must for long term wealth creation
- If you want to surrender these, you loose a lot in terms of returns
- On surrendering, the tax benefit you claimed earlier, would be reversed and you would need to pay these taxes back
- On maturity, you cannot withdraw the entire corpus and have to compulsorily buy Annuity

- As first time investors, it makes sense to either invest in eligible mutual fund schemes or ETFs
