**For First Tree:** Here is a Small Tree which is show that **co.** is newly incorporated under co. act and also show the first Rank of co. means clause (i) because tree is so small. So the sec is sec3(1)(i)

**For Second Tree:** This Tree is showing that the tree is exist which show **existing co.** under co. act and also show the decond Rank of co. means clause (ii). So the sec is sec3(1)(ii)

**For Third Tree:** This Tree is Smaller than the last tree which is showing **Private co. Because the size of a Private is always smaller than the Public co.** and its third position showing that third Rank of co. means clause (iii). So the sec is sec3(1)(iii)

**For Fourth Tree:** This Tree is bigger than the all the tree which is showing **Public co. Because the size of a Public co. is always bigger than the all co.** and its fourth position showing that fourth Rank of co. means clause (iv). So the sec is sec3(1)(iv)
