The word **automation** has its own pros n cons. Anyone have some different imagination of this word. What, why, how, to whom and so many doubt come to their mind. All of sudden this word is on everyone's tongue. **Automation..., Automation..., Automation...**, after all what is this! Nobody was disposed to the automation of filing of return will be mandatory for everyone. Everyone was like no, no, we are fine in the situation as we are. We don't want any change. Everyone was addicted to submit the return manually. How can you compel us in such a way without any intimation or without any pre-guidance? How we got a mail from ACES admin as we don't have any mail account? Even we don't have any computer at our premises. Humara Kya Hoga?

But if the automation has taken place then it will be very convenient to file the returns as we have seen on Income Tax and VAT side. There is no need to go to any department and we can file the same while sitting on home. The main purpose of the automation on the Government is to reduce corruption as well as to view data as and when needed. Earlier the department was asking "n" number of details for comparison. Now there will be no need for the same. The data required by Commissioner will be available to them on

their computers and that too in the format they require the same. Assessee need not to compile and give the same to them. The audit will also not require the same for desk review. It will be readily available to them. The time of assessee as well as of officers will be saved. The pendency level at the department will also come down. Till now, the returns are filed online. Henceforth, all the permissions will be granted online. There will not be any delay. Department will give permissions in time bound manner. If they require any information from assessee then the same will be provided online. The piece meal queries will not be asked. As such, the automation will be beneficial to both i.e. assessee as well as to department.

We are explaining
