- W.e.f 27th March, 2011, Ministry has decided to accept payments of value upto Rs.50,000 in electronic mode only
- Following is applicable for online payment only
- According to a new ruling, the Reserve bank of India -RBI has made it mandatory for all banks issuing credit and debit cards to provide additional authentication information over and above what is visible on the card. To prevent fraud and to make online shopping safer, the RBI has made it mandatory, from 1st August onwards, for all online transactions to have increased security via registering each and every card with its respective merchant. This means that every time you make an online transaction you will have to enter this additional password given by the merchant. **This is commonly known as VBV - Verified by Visa or MSC - MasterCard SecureCode**
- This new ruling will add an entirely new dimension to online security and as per the directive issued by the RBI on February 18, also mandates a system of online alerts to the cardholder for all 'card not present' transactions that exceed Rs 5,000. The circular adds that banks would be penalised for non-adherence to the directive under the Payment and Settlement Systems Act 2007.
- **How will VBV /MSC work:** Once your card is activated with the Verified by Visa / Master Secure service, your card number will be recognized whenever you make an electronic payment. After you provide your credit card details online, you will be redirected to your issuer website and then required to specify your Verified by Visa / Master Secure authentication details. Your identity will be verified, and the transaction will be completed. Based on the authentication provided by your issuer, the transaction will be processed & you will get a confirmation.
