

PAPA KAHTE HEY BADA NAM KAREGA-----

YA -----YOU CAN DO IT-----REMOVE YOUR DOUBTS ABOUT CA

Big-4-confussions

➤ **VERY COMPLICATED COURSE AND VERY TOUGH TO CLEAR?**

➤ **WEATHER JOIN CA OR NOT**

➤ **3.Age limit?**

➤ **4- saying ca has to take and complete within 25 or 30?**

Ca is big profession and highly positioned in corporate world and as well in too practices also; we have total 3 lack plus people as member and including students. We are happy to see now days so many people or opting for ca, that's great news to all of us that ca people are growing now a days...This is the high profession course and I hope it can grow more by people opting this course more...

Have to clear some points here for people

1. People are thinking its very complicated course and very tough to clear?

A) First of all ca is great profession to enter corporate world or in too practice, my view is nothing difficult in the world when person makes mind to clear and aim for high. First people should understand weather they going in right directions and should make their mind if they taking ca then they should not see back once they enter and should clear it off by any chance. **If one who work hard with dedications, confidence then he or she can come out with colors.** So don't think its tough one any one can crack this but make your mind once you can do it then nobody cant stop by aiming. All the best.

2.Some people still in confuse mind weather to take ca or not, they got feared by some people saying its very difficult course so don't waist of

time taking ca instead of that take some other course which you can complete easily and you can get into job fast?

A) First of all want to say when you made a mind to take ca and you can clear this one, then don't think or listen anybody, its depends people to people mind. Listen your mind and do like that, don't spoil your career by listening others, I am not saying you have to do only ca for making bright career, you can do any other course also that's your wish, but when you want to do ca then take it and clear it off don't leave in the middle. All the best.

3.Age limit?

A) There is no such criterion of age for doing ca; any one can do this course.

4. People will think or will get wrong news or some people will discourage them by saying ca has to take and complete within 25 or 30?

People or thinking has to complete within 22 or 25 like that, other wise no use of doing ca. Have to say ca its not simple course that you can clear in single attempt some can clear but not all, it will take time to clear also and this is not degree or pg course that one can complete in the easy way. Some should think that we are doing professional course and have to work hard for that then only you can crack the exams. Some will take 1 r 2 attempts; some can take 5 or 10 attempts also, or in some problem they can't attend the exams also. And they will come back after break and wanted to complete the ca and there age will be 30 r 35 that time, we should learn and get inspired from them that they are taking ca that time and doing. We should not discourage any one who are taking ca in 30 or 40 or completing by that age. We should feel proud of them and get motivate from them and should encourage them...

Please don't discourage any one, be encourage and motivate them to do...all the best

CA= VERY GOOD PROFESSION

CPT=NO AGE BAR

PCC/IPCC=NO AGE BAR

FINAL=NO AGE BAR
