

Simple suggestions to deal with Exam Failure

Dear Friends,

I would like to start this write-up with a meaningful saying “Failure improves the taste the victory”. Further I’d like to congratulate you all for putting such great effort towards November 2009 CA Exams. Remember Success or Failure is a different thing altogether. Even if you did not do well in exam and got failed, there is really no need to panic now. Obviously it feels terrible but let it be. Failing exams does not make you a failure in life and most importantly it is not the end of world.

ANALYSE YOUR MISTAKE

Now it is high time to realize and analyse your mistakes committed in the exam hall. Don’t hesitate and look within yourself and analyse the reason responsible for your failure. If you honestly follow this advice am sure you’ll be able to draw certain constructive conclusions helping you avoid making the same mistake again.

In this situation self assessment is the best thing to do and believe me only you can help yourself by searching out the best possible solution to your problem.

NEVER LOSE YOUR CONFIDENCE

It’s my humble request to you all that do not lose your confidence just because you got failed in examination. Self confidence is of paramount importance in professional examinations like CA, CS and CWA etc. So I would advise you to be with confident people as a good circle can play a very decisive role in your success as far as question of confidence is concerned. You can easily evaluate the importance of confidence yourself. Just check your confidence level after clearing one group of CA or CS or any other professional examination. Sincerely hope now you can understand what confidence is all about.

IMPORTANCE OF GOOD FRIEND CIRCLE

According to me a good friend circle plays a very important role in one’s life and career growth. A good friend circle also ensures your focus on your goal. So just be with good friends and discuss and share the things with them. This circle also becomes important when you are in some kind of negative situation and helps you to get out of such moments of frustration and prevent you to take a disastrous decision. So it is very important to have a good friend circle.

DO NOT BLAME YOURSELF

In case of exam failure there is no need to blame yourself or your institute or anyone else. It's all right yaar. Kindly appreciate you are not the only student who got negative result. It happens in professional exams. So nothing to worry about and just move ahead and move with the flow and believe me things will be all right soon.

SUICIDE IS NOT THE SOLUTION

Suicide is not the solution of anybody's problems. All the problems in this world are of temporary nature with permanent solution. On the contrary I would advise you to love your problems as you can learn a lot from your problems and in fact they are in your life to teach you something really indispensable. I personally feel that suicide is a selfish act, the victims of which are your family, parents and friends who care for you. The pain of losing someone close can be devastating and reason or circumstances under which you lose that someone doesn't make any difference. Before committing suicide one must think that there is hope and there is answer to every problem and failure of life. A foolish step can adversely change the life of those around you. Please think about it. I would urge you to be a bit strong in life and stay away from any kind of suicidal tendencies and thoughts.

CONCLUSION

I would like to conclude this write-up by mentioning few lines borrowed from Mr. Robin Sharma's book – "Sit down now and write out a list of all that you have in your life. Start first with your health or your family - the things we often take for granted. Put down the country we live in and the food we eat. Do not stop until you have written down fifty items. Once every few days, go through this list - you will be uplifted and recognize the richness of your existence."

Hope I'm able to bring something constructive through this brief write up. Impatiently awaiting your kind response on the above mentioned suggestions/points.

Thanks and Regards
Ankur Garg
