

Daily Study Routine

Every students have own daily routine in their life. Many students are confused about the daily routine for the preparation of all subjects in a timely manner for their exam. And many of them even unable to decide that which subject they read at which time. Some students like to read at night and someone believes in the morning. It hardly matters the time morning or evening or even night. Whenever you fill comfort please try to read at that time. It depends on your environment/society and your personal life. In a 24 hours whenever you free from your daily life routine try to utilize it for study.

I just endeavor to help you for the preparation of your Daily Study routine so that you will be able to complete your syllabus in time.

First of all divide the week in 3 parts viz. Learning Days, Revision Days And Test Day.

Learning Days will be as per your no. of subjects divided by Two say you have 8 subjects then the Learning Days will be 4 Days (Monday, Tuesday, Wednesday And Thursday).

Test Day will be Sunday.

The Balance days will be Revision Days (here 2 days viz. Friday and Saturday).

Now divide each Learning days into two parts viz. Practical Hours and Theory Hours.

Divide Each Revision Days according to your subject so that each subject can be revised (here 4 parts as the subject is 8 and revision days are 2).

Now considering above suggestion I draw a table as below:

Learning Days				
Day/Time	7 a.m.- 3.00 p.m.		3.00 p.m.-11.00p.m.	
Monday	Practical Paper		Theory Paper	
Tuesday	Theory Paper		Practical Paper	
Wednesday	Practical Paper		Theory Paper	
Thursday	Theory Paper		Practical Paper	
Revision Days				
	7 a.m.- 11.00 a.m.	11.00a.m – 3.00 p.m.	3.00 p.m. – 7.00 p.m.	7.00 p.m. – 11.00p.m.
Friday	Theory Paper	Practical Paper	Theory Paper	Practical Paper
Saturday	Practical Paper	Theory Paper	Practical Paper	Theory Paper
Test Day				
Sunday	Take Any subject and try to solve a previous question paper assuming you are in a examination hall. Visit web site which gives you updates relating to your subject.			

Note: It is not required for any breaks in between because you may give relax yourself any time whenever you need. The time prescribed by me can be followed by a student who had their office and they are not enough time to read the subjects. My advice for those students is that please try to manage the time and read/learn subjects as per study routine even in the night. Many students are just plan thousands of time and takes the suggestion from other students/friends and teachers but not start reading. I want to say to those students that don't worry and just start your reading first and let me know whether this study routine had helped you.

I would like to conclude by wishing you "Best of Luck" for your coming Exam.

"Be Positive, Be Confident, Keep Smiling and Never Give up"

With best wishes

Suresh Prasad
