* Exclusive of book-built issues, lower of the price band taken to calculate the issue size.

** Amount is exclusive of book-built issues, where price is not yet determined/intimated.

Notes: 1. As regards data starting from January 2004, the issue size is calculated by multiplying no. of securities offered by issue price. Issue sizes contained in this table do not include that of book built issues as the issue price is neither fixed at the time of filing of documents nor issuance of observations. Further for the fixed price issues having price band, issue size is calculated by multiplying number of securities offered with the floor price of the price band.

2. The no. of issues opened for a period might not tally with the no. of observations issued in the same time period due to various reasons like time lag in opening an issue after SEBI observations, decision of issuers not to go ahead with the issue etc.
