

CAN I SECURE A RANK IN CA FINAL ?

I have heard many times that **NOTHING is IMPOSSIBLE** and just believed it, never tested this one. Don't know who said it but who so ever the person was might had some logics for it. Now it's the time to check the accuracy of these words. I am a student of CA-Final with the 11 months to go for my first attempt of CA-final exams.

While planning for my studies the first question I asked myself was should I go for a rank? The obvious answer was YES. Believe me friends if you have a tag of rank holder with your name it makes a lot of difference you are always noticed everywhere. But how would I do this cracking the exams of CA final in first attempt and that too with a Rank sounds quite difficult but not impossible many had done this before, I guess they were intelligent .Am I intelligent? Don't think so but our institute believes so, you are in CA final means you are intelligent you deserve to be here. So every student of CA final is the most competent and the deserving one to be a part of CA fraternity.

But what about Rank? Definitely it's not a big deal just make your planning well, do the same things differently with a passion and desire to achieve your goals whatever it be. Remember the 4D of success Dream, Desire, Devotion and Dedication. Success is not only an end or destination it's a journey, a path through which you have to walk sincerely. So my words go for a Rank as I will.

There is no short cut for success only way to achieve your dream is the hard work. Start your each day with much harder efforts stepping towards your goal. Start your studies with proper planning as said with proper planning half the work is done. Prepare plans both long term and short term keeping in mind the available timing and your schedule. Make every second count, if you care for seconds, hours will care for you. Only best friend we have is our watch respect it, certainly it pays back. Give your 100% for each subject but study conceptually. Plan your time for regular revisions and work on your presentation. Keep yourself updated and gives the best out of you.

While studying keep yourself in the position of a rank holder and question yourself what would a ranker do while studying , would he have left this topic , how much he would have practiced ? You will get all your answers and you yourself would be stimulated to study like rank holder its only a matter of your belief just believe you can do this , you can tag rank holder to your name.

Nothing is impossible truly said just go for a rank. Work harder, harder and harder for your dreams they do come true.

Best wishes
