The terms of issue of debentures provided that they were redeemable at a premium of 5% and also conferred option to the debentureholders to convert 20% of their holding into equity shares (Nominal value Rs.10) at a price of Rs.15 per share. The Company recognizes cheques dated 31st March or before, received from customers after balance sheet date, but before approval of financial statement by debiting 'Cheques in hand account' and crediting 'Debtors account'. The 'cheques in hand' is shown in the Balance Sheet as an item of cash and cash equivalents. All cheques in hand are presented to bank in the month of April and are also realised in the same month in normal course after deposit in the bank. Returns from the customers are Rs.3,000.
Cash received from debtors is Rs.2,30,000.
Cash received from debtors in transit is Rs.14,000.

PAPER – 5 : ADVANCED ACCOUNTING

- (x) Closing stock for the year ending on 31.3.2010 is Rs.50,000 which includes stock damaged in a fire in 2008-09. On 31.3.2009, the estimated net realisable value of the damaged stock was Rs.12,000. The revised estimate of net realisable value of damaged goods amounting Rs.4,000 has been included in closing stock of Rs.50,000 as on 31.3.2010.

Find the value of closing stock to be shown in Profit and Loss account for the year 2009-10.
(10 × 2 = 20 Marks)

Answer

(i) Calculation of number of equity shares to be allotted

	Number of debentures
Total number of debentures	20,000
Less: Debenture holders not opted for conversion	<u>(2,500)</u>
Debenture holders opted for conversion	<u>17,500</u>
Option for conversion	20%
Number of debentures to be converted (20% of 17,500)	3,500

Redemption value of 3,500 debentures at a premium of 5%

[3,500 × (100+5)]

Rs.3,67,500

Equity shares of Rs.10 each issued on conversion

[Rs.3,67,500/ Rs.15]

24,500 shares

- (ii) As per AS 12 'Accounting for Government Grants', when government grant is received for a specific purpose, it should be utilised for the same. So the grant received for setting up a factory is not available for distribution of dividend.

In the second case, even if the company has not spent money for the acquisition of land, land should be recorded in the books of accounts at a nominal value. The treatment of both the grants is incorrect as per AS 12.

- (iii) As per AS 16 'Borrowing Costs', borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets* should be capitalised as part of the cost of that asset. Other borrowing costs are recognized as expense in the period in which they are incurred.

* A qualifying asset is an asset that necessarily takes substantial period of time to get ready for its intended use or sale.

INTEGRATED PROFESSIONAL COMPETENCE EXAMINATION : MAY, 2010

The treatment for total interest amount of Rs.65 lakhs can be given as:

<i>Purpose</i>	<i>Nature</i>	<i>Interest to be capitalised (Rs. in lakhs)</i>		<i>Interest to be charged to Profit and Loss A/c (Rs. in lakhs)</i>	
Installation of Plant and Machinery	Qualifying asset	$320 \times \frac{65}{500} =$	41.60		
Advance to suppliers for additional assets	Qualifying asset	$50 \times \frac{65}{500} =$	6.50		
Working Capital	Not a qualifying asset			$130 \times \frac{65}{500} =$	16.90
			48.10		16.90

- (iv) Even if the cheques bear the date 31st March or before, the cheques received after 31st March do not represent any condition existing on the balance sheet date i.e. 31st March. Thus, the collection of cheques after balance sheet date is not an adjusting event. Cheques that are received after the balance sheet date should be accounted for in the period in which they are received even though the same may be dated 31st March or before as per AS 4 "Contingencies and Events Occurring after the Balance Sheet Date". Moreover, the collection of cheques after balance sheet date does not represent any material change affecting financial position of the enterprise, so no disclosure in the Director's Report is necessary.
- (v) Generally, the assets sold upon dissolution of partnership are realised only in small instalments over a period of time. In such circumstances the choice is either to distribute whatever is collected or to wait till whole amount is collected. Usually, the first course is adopted. In order to ensure that the distributed cash amongst the partners is in proportion to their interest in the partnership concern either of the two methods described below may be followed for determining the order in which the payment should be made.
- (1) *Maximum Loss Method:* Each instalment realised is considered to be the final payment i.e. outstanding assets and claims are considered worthless and partners' accounts are adjusted on that basis each time when a deposit is made following either Garner Vs. Murray rule or the profit sharing ratio rule.
 - (ii) *Highest Relative Capital Method:* According to this method, the partner who has the higher relative capital, that is, whose capital is greater in proportion to his profit sharing ratio is first paid off. This method is also called as proportionate capital method.

PAPER – 5 : ADVANCED ACCOUNTING

- (vi) The need for unexpired risks reserve arises from the fact that all policies are renewed annually except in specific cases where short period policies are issued. Since the insurers close their accounts on a particular date, not all risks under policies expire on that date. Many policies normally extend beyond this date into the following year during which risks continue. In other words, at the closing date, there is unexpired liability under various policies, which may occur during the remaining term of the policy beyond the year end.

According to the requirements of the Insurance Act, it is sufficient if the provision is made for unexpired risks at 50 per cent for Fire, Marine Cargo and Miscellaneous business except for Marine Hull which has to be 100 per cent.

(vii) Conversion of ledger balances (in Dollars) into Rupees

	\$	Rate per \$	Amount in Rupees
Building	180	42	7,560
Stock as on 01.04.2009	26	46	1,196
Cash and bank balances	57	50	2,850
Purchases	96	48	4,608
Sales	110	48	5,280
Commission receipts	28	48	1,344
Debtors	46	50	2,300
Creditors	65	50	3,250

- (viii) A cash credit overdraft account is treated as NPA if it remains out of order for a period of more than 90 days. An account is treated as 'out of order' if any of the following conditions is satisfied:

- (a) The outstanding balance remains continuously in excess of the sanctioned limit/drawing power.
- (b) Though the outstanding balance is less than the sanctioned limit/drawing power –
 - (i) there are no credits continuously for more than 90 days as on the date of balance sheet; or
 - (ii) credits during the aforesaid period are not enough to cover the interest debited during the same period.
- (c) Further any amount due to the bank under any credit facility is 'overdue' if it is not paid on the due date fixed by the bank.

INTEGRATED PROFESSIONAL COMPETENCE EXAMINATION : MAY, 2010

(ix) Calculation of sundry debtors as on 31.03.2010

		Rs.
Sundry debtors as on 01.04.2009		50,000
Add: Credit sales		<u>2,50,000</u>
		3,00,000
Add: Cash received from debtors	2,30,000	
Cash received from debtors in transit*	14,000	
Returns from the customers	3,000	
Bad debts @ 2% of Rs.50,000	1,000	
Discount to the customers @ 1% of Rs.50,000	<u>500</u>	<u>2,48,500</u>
Sundry debtors as on 31.03.2010		<u>51,500</u>

- (x) The fall in estimated net realisable value of damaged stock Rs.8,000 is the effect of change in accounting estimate. As per AS 5 'Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies', the effect of a change in accounting estimate should be classified using the same classification in the statement of profit and loss as was used previously for the estimate.

Thus, the value of closing stock for the year 2009-10 will be as follows:

	Rs.
Closing Stock (including damaged goods)	50,000
Less: Revised value of damaged goods	<u>(4,000)</u>
Closing stock (excluding damaged goods)	<u>46,000</u>

INTEGRATED PROFESSIONAL COMPETENCE EXAMINATION : MAY, 2010

(c) (i) Computation of annual lease payment to the lessor

	<i>Rs.</i>
Cost of equipment	10,00,000
Unguaranteed residual value	1,00,000
Present value of residual value after third year @ 10% (Rs.1,00,000 × 0.7513)	75,130
Fair value to be recovered from lease payments (Rs.10,00,000 – Rs.75,130)	9,24,870
Present value of annuity for three years is 2.4868	
Annual lease payment = Rs. 9,24,870/ 2.4868	3,71,911.70

The present value of lease payment i.e., Rs.9,24,870 equals 92.48% of the fair market value i.e., 10,00,000. As the present value of minimum lease payments substantially covers the initial fair value of the leased asset and lease term (i.e. 3 years) covers the major part of the life of asset (i.e. 5 years). Therefore, it constitutes a finance lease.

(ii) Computation of Unearned Finance Income
