

PROF.JIGNESH CHHEDA(JC SIR)

Hello friends,

Here are some of useful tips for cracking the most difficult subject(only from students point of view) CA FINAL ISCA.

- Write the answer in point form only
- Your answer should be in accordance with ICAI study material.
- Present your answer in diagrammatic or flowchart form whenever possible.
- Most imp write your paper with good hand writing.
- Every day read ISCA for 1hour and 30 min. and keep revising.
- Prepare points summary and post on your wall.
- Read your question twice and make sure that from which chapter it belongs to avoid confusion.
- Attempting section always remember only quote section or subsection when you are sure otherwise avoid writing.

Apart from above points planning ISCA is very important. While studying ISCA students should maintain sequence of chapter to be studied. Preferably students should read in following order as chap 1,5,6,7,9,8,10,2,3,4.

Students should also Study Rpt for at least last 3 attempts. And also check mock test paper of ICAI.

All the best.

Regards ,

Prof. Jignesh Chheda
