

CA ARTICLESHIP... WHEN SHOULD WE START?

Planning to join **CA ARTICLESHIP** ?

It is right time, students may evaluate, whether to join **ARTICLESHIP** after passing of **EITHER OF THE GROUP** or **BOTH GROUPS** of Intermediate.

Joining Articleship after passing of any one group, creates a situation, student has to attend classes for other group, self-study and simultaneously attend office for Articleship.

It happens to be strenuous and he is unable to devote adequate attention to either of the activity and he is trapped in a **VICIOUS CIRCLE**.

It is in the interest of Students to be confirmed, whether we get sufficient time for adequate training and exposure during Articleship for want of time? It is the main objective of **ARTICLESHIP**. If we do not get, who is at loss? Obviously **THE STUDENT**.

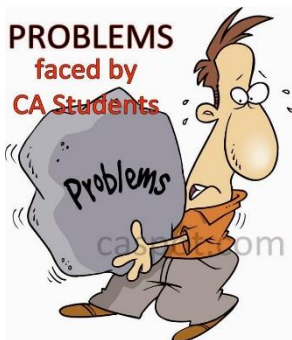

What might be purpose of allowing to join **ARTICLESHIP** after passing either of the group? Whether it is beneficial to **THE STUDENTS** ?

Does starting **ARTICLESHIP** earlier, would mean we would be able to complete our degree earlier?

What is the % of students passing other group in the first attempt during the period of **ARTICLESHIP**? What about others who require more attempts due to inadequate time available for studies?

PROBLEMS
faced by
CA Students

Students have to think and take care of their interest on their own.

What masses do, might be or might not be your path to follow. It will depend altogether on your own abilities. So one may think independently and decide his own plan.

All the Best !
