

avkabra@rediffmail.com

Sandboxie runs your programs in an isolated space which prevents them from making permanent changes to other programs and data in your computer.

It is not a antivirus software but help to avoid spraying viruses in whole the hard drive. It can run any program in it (for safety). By using it viruses can be blocked in the sandbox. If we delete d sandbox , we also delete d viruses in it

It is a very useful software in addition to a antivirus.

Latessted version Can be downloaded at:
