

Monitoring cells with a Watch Window

In some situations, you may want to monitor the value in a particular cell as you work. As you scroll throughout the worksheet, that cell may disappear from view. A feature known as Watch Window can help. A Watch Window displays the value of any number of cells in a handy window that's always visible.

To display the Watch Window, choose **Formulas** ➞ **Formula Auditing** ➞ **Watch Window**. The Watch Window appears in the task pane, but you can also drag it and make it float over the worksheet.

To add a cell to watch, click Add Watch and specify the cell that you want to watch. The Watch Window displays the value in that cell. You can add any number of cells to the Watch Window, and you can move the window to any convenient location.

Book	Sheet	Name	Cell	Value	Formula
budget.xlsx	Marketing		E8	173,310	=SUBTOTAL(109,[Ap
budget.xlsx	Manufacturing		F9	1,423,601.13	=SUM(F4:F8)
budget.xlsx	Sheet1	grandtotal	C9	78984	=SUM(C1:C8)

Use the Watch Window to monitor the value in one or more cells.

Tip: Double-click a cell in the Watch Window to immediately select that cell.
